

# Custom Processing Operations

- **Custom Processing Owner**
  - Purchaser/owner of the seafood product.
  - Sets up another processor to receive, expedite, or process seafood on their behalf.
  - Must establish a custom processing owner operation for each plant that does the actual processing.
  - Allows owner of the catch to maintain visibility and control of landing reports and to electronically review submitted landing reports created by custom processors.
  - May remove authorization of processor to access reports if the business relationship be terminated.
  - Owner must have a valid license with the State, and may have their own receiving permits from NMFS. These permits are used to establish the custom processing owner operation.

- **Custom Processor**

- The operation in possession of seafood product, but not the owner or a direct agent for the owner.
- A processor, business, or entity that provides the service of seafood receiving, expediting, or processing but has not purchased (does not own) the seafood.
- Landing reports are usually done by users at the plant doing the custom processing for the custom processing owner.

## eLandings

Interagency electronic reporting system for commercial fishery landings in Alaska

Alaska  
Department of  
Fish and Game

International  
Pacific Halibut  
Commission

NOAA  
Fisheries

### How to Get Started

1. **REGISTER** : Before users can use the eLandings system to report landing or production report data, they must request authorization to use the system and reserve a UserID and password. A UserID will be activated after a signed registration form is submitted to: NMFS/RAM eLandings Registration, PO Box 21668, Juneau, AK 99802, and approved.
3. **LOGIN** : The eLandings system will allow registered users to submit landing and production reports. Users can submit their landing and production report data to all of the mandated agencies through a series of eLandings web pages. Users can also import data in a specified XML format via the eLandings web site.

### No Internet Connection?

- **Don't have access to the internet?** : A processor workstation is available to clients, like catcher/processors, who are not connected to the internet. Please email: [eLandings@alaska.gov](mailto:eLandings@alaska.gov) or phone: (888) 443-5726 for more information.
- **Temporarily disconnected from the internet?**

**IFQ Landings (halibut, sablefish, or crab)** Use [these instructions](#) . Contact your local office of ADF&G for additional IFQ interim eLandings booklets, as needed.

# Types of Permissions

- Primary
  - Required for each operation
  - An administrative user for the operation
  - Each operation has only one primary user
  - Cannot have administrative privileges removed, but can be disabled
  - May change
- Administrative
  - When a user registered an operation they automatically become an administrative user for that operation
  - May add or revoke authorizations for other users to use the operation
  - May grant administrative privileges to other users for an operation

# Other types of permissions

- Limited
  - May view and edit landing reports they create. Once other office staff members have made additional edits they will lose the ability to view or edit that report.
  - Staff who unload catch from delivering vessels, but who are not responsible for submitting fish tickets and landing reports, such as dock foremen.
  - An agent who is not an employee of your company.
- Disabled
  - User may be temporarily disabled, but left in place so that it can be restored in the future.
  - Used for seasonal employees who are leaving the operation, but are expected back the next season.
- Remove
  - Used for users who are not expected back, such as employees who are fired.
