seaLandings consolidated report for catcher processors

Creating a Consolidated Report

The Consolidated report is a tool used by catcher processors that allows them to create landing reports populated with production report data over the length of a fishing trip. This tool is not to be used by motherships.

Note: In order for this tool to work, the user has to have at least one production report already entered in seaLandings. Before you being please make sure you have completed at least one production report.

Double-click on your seaLandings icons to start the program.

Enter your user ID and password. If you're using the training environment of seaLandings, enter the following:

User ID: splankton Password: S_plankton

🙆 Login		×
	Release 2022.09.20-14.59.09	
User ID:	splankton	
Password:	•••••	Show Password
