Scenario

A longline vessel (ADF&G# 10620) is delivering 18,000 lbs of condition 01 sablefish to The Pisces Plant. There are two CFEC permit holders making the delivery: one wants to allocate 14,400 lbs of sablefish to his permit, the other wants to allocate 3,600 lbs to her permit.

In this instance, we'll use the percent filed of the permit worksheet to allocate the catch. All 18,000 lbs of the sablefish is being sold for human consumption.

The sablefish was harvested in the following stat areas:

365701 & 365630
